This program offers health, wellness, fitness and nutritional information and is provided for informational purposes only. This information is not intended as a substitute for the advice provided by your physician or other healthcare professional. You should not rely on this information as a substitute for, nor does it replace, professional medical advice, diagnosis, or treatment. Always speak with your physician or other healthcare professional before taking any medication or nutritional, herbal or homeopathic supplement, or using any treatment for a health problem. If you have or suspect that you have a medical problem, contact your health care provider promptly. Do not disregard professional medical advice or delay in seeking professional advice because of something you have seen or heard in an educational program or read on this web site. The use of any information provided on this web site is solely at your own risk. Nothing stated or posted on this web site or available through any services offered by Dr. Jessica Peatross are intended to be, and must not be taken to be, the practice of medicine. Information provided on this web site DOES NOT create a doctor-patient relationship between you and any doctor affiliated with our web site. Information and statements regarding dietary supplements have not been evaluated by the Food and Drug Administration and are not intended to diagnose, treat, cure, or prevent any disease.

Root cause reasons

1. Mold/Fungus or having HLA DR and being exposed drastically-ie. Red tide, Harmful Algae Bloom, cyanobacteria, severely moldy home or home full of gram negative bacteria that contain toxic LPS (lipopolysaccharides). SEARCH YOUR HISTORY AND LOCAL ENVIRONMENT DILIGENTLY.
2. Neurotoxins from BMAA found in all algae have been linked (harmful algae bloom but it is also a blue green algae that can bioaccumulate in fish or seafood)
3. 5-10% is Genetic susceptibility such as a gene that does not let ubiquilin2 recycle properly which impedes the glymphatic system or the gene mutations in SOD1 and C9orf72
4. Oxidative stress and mitochondrial dysfunction
5. Glutamate toxicity from pathogens, gluten, other toxins
6. Oral infections and dysbiosis

Solutions

1. Riluzole (Rilutek) the only drug approved for ALS
2. Biotxin binder, Carboxy, HM ET or Viradchem binder-go slow as this will exacerbate spasticity if you pull fungal elements too hard from the body but they will pull fungal elements systemically from the body
3. Low dose naltrexone
4. Muscle relaxers to temper symptoms as you attempt binder
5. MtoATP, acetyl L carnitine powder, CT minerals for mitochondrial health
6. GABA promoting supplements-chamomile, skullcap, Phenibut
7. Open drainage pathways via sweating, pooping, liver function
8. www.iaomt.org for a biological dentist to evaluate dental health or check out www.blodgetdentalcare.com for a virtual second opinion.
